Odoo: The Smart Solution for Growing Businesses

Odoo is a comprehensive ERP solution designed to give businesses full control over their operations. Known for its reliability and advanced features. Odoo offers a modular structure with apps for accounting, CRM, sales, inventory and more.

01

All-in-One Solution

Odoo offers integrated apps for accounting, HR, sales, CRM, and more eliminating the need for multiple platforms.

02

User-Friendly Interface

Its intuitive design ensures quick adoption with minimal training.

03

Customizable and Scalable

Tailor Odoo to specific needs, and scale as your business grows.

04

Regular Updates

Odoo provides frequent updates, such as Odoo 17 with performance improvements, AI tools, and WhatsApp integration.

05

Seamless Integration

Odoo integrates smoothly with other tools, streamlining workflows and reducing errors.

06

Open-Source Flexibility

Cost-effective and fully customisable giving you control over your software.

At GTech Solutions, we trust Odoo as a reliable solution for businesses looking to grow efficiently and increase their return on investment. We help businesses optimise Odoo by integrating customer data, offering tailored solution integration, providing full setup support, including installation, customisation and training.

One-Stop Business Solution by Odoo

Sales
Convert quotations into sales orders with a single click.

Purchases
Easily manage suppliers and purchase orders.

Inventory
Track every stock move from purchase to warehouse to sales order.

Accounting
Create invoices, manage recurring billings, track payments, and more.

CRM
Track leads, close opportunities, and get accurate forecasts.

Reports & Analysis
Built-in reports to monitor and grow your business.

Documents
Save time scanning bills and contacts, approving documents.

Human Resources
Manage your employees and store all important staff information.

Projects
Plan ahead for upcoming projects with forecasts and analysis.

New Features and Performance Upgrades in Odoo 17

01 General

Odoo 17 offers a cleaner UI, better search options, new sidebar tools, mobile shortcuts, enhanced email management, improved chat features, and integrated map sidebars for smoother navigation.

02 Accounting

Enhancements include AI-driven billing, better reconciliation, early discount options, improved reporting with more customisation for branches and delivery management.

03 Employees

New tools for generating CVs, signature requests, certification reports, and skills upgrades, along with a better organisational chart system.

04 Point of Sale (PoS)

Includes combo deals, credit limit support, QR code scanning, and self-ordering capabilities for enhanced efficiency in retail.

05 Website

Improved customisation features, including drag-and-drop tools, carousel snippets, font responsiveness and ChatGPT configurator for enhanced web design.

06 Sales

New integrations with Amazon, better product documentation, partial payments and support for global discounts.

Maximise Your Business's Potential with Seamless Integration Services

Salesforce

Salesforce is a premier CRM platform that aids businesses in managing their sales, marketing and customer service operations. It offers a range of features designed to streamline processes, improve customer interactions and drive significant business growth. Salesforce enables departments to operate more cohesively.

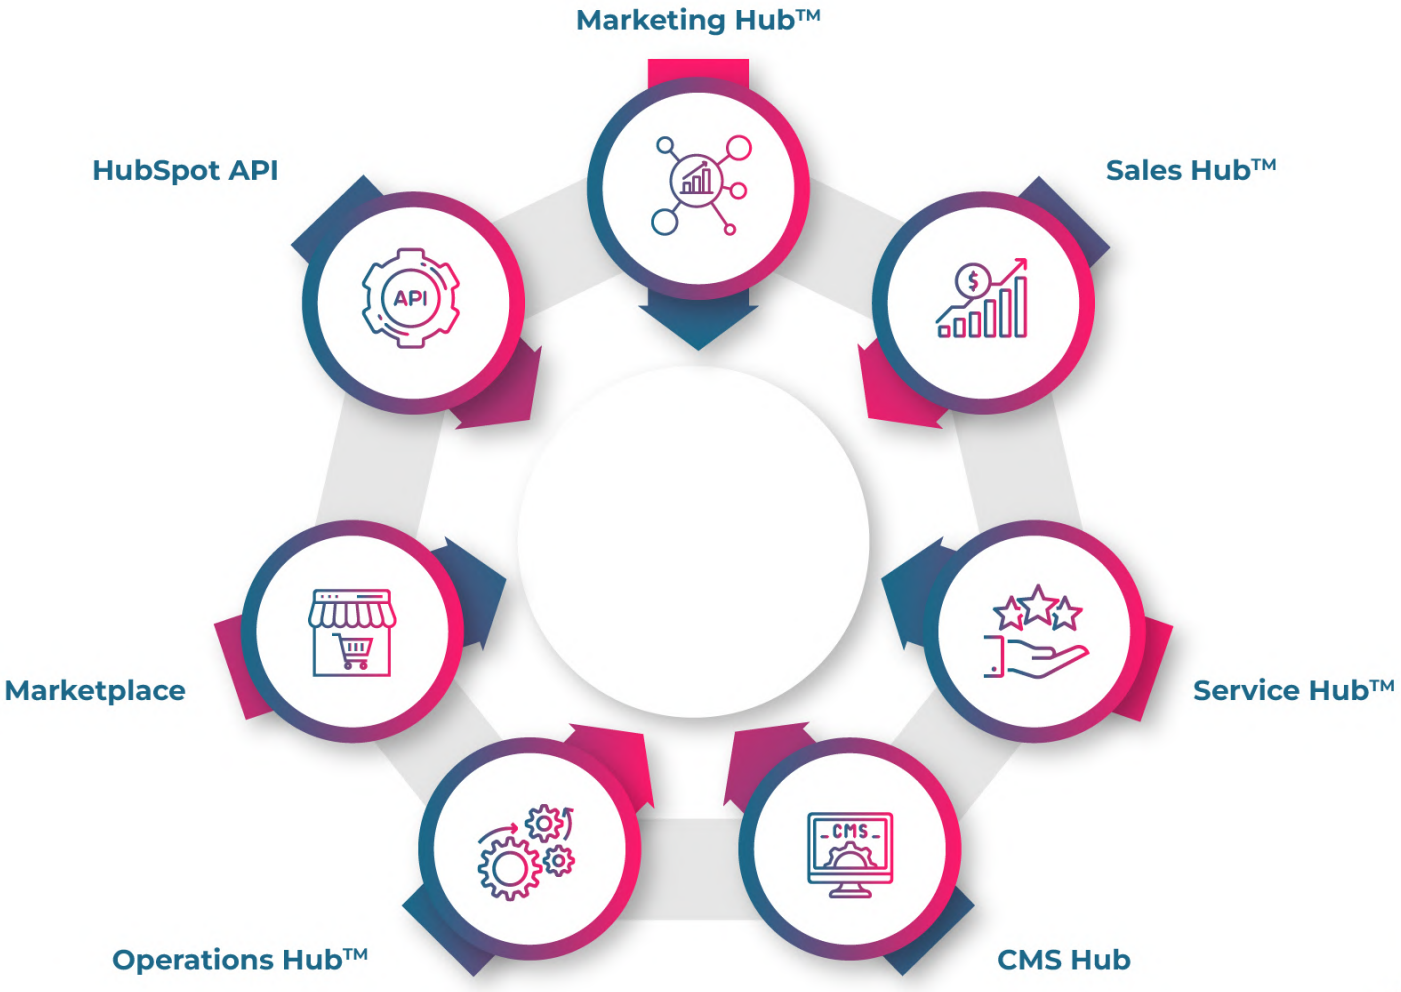

Our team at G-Tech Solutions specialises in integrating Salesforce with your current systems. This integration ensures that all your data is harmonised, improving data management and enhancing the way you interact with customers. We handle the complexities of integration so you can benefit from Salesforce's robust features right away.

HubSpot

HubSpot is an all-in-one platform designed to unify your marketing, sales, and customer service efforts. It features powerful tools for marketing automation, lead management, CRM and analytics. By centralising these functions, HubSpot helps teams work together more effectively, leading to increased productivity and efficiency.

At G-Tech Solutions, we are experts in integrating HubSpot with your existing systems. Our services ensure that your data flows seamlessly between platforms; enhancing your ability to manage customer relationships. We take care of the technical aspects so you can focus on leveraging HubSpot's capabilities to grow your business.

THE POWER OF A SINGLE SOURCE OF TRUTH FOR OPTIMAL SUCCESS

Why do we focus on getting your business a single source of truth?

Having a single source of truth means that all departments and individuals within an organisation can rely on a shared database or platform to obtain the most current and accurate data. Thus, you will have all your business information on one platform.

01 Data Consistency

With a single source of truth, all data related to customers, products, inventory, orders, finances, other aspects of the business is stored and maintained in one centralised location. This ensures everyone can access accurate and up-to-date information, reducing the risk of conflicting or outdated data across different systems or departments.

02 Improved Decision Making

When all relevant data is available in one place, it becomes easier to analyse and extract insights. Decision-makers can access real-time information, generate reports, dashboards, and analytics to make informed decisions. This enhances the organisation's ability to respond quickly to market changes, identify opportunities, and address challenges effectively.

03 Enhanced Collaboration

A single source of truth promotes collaboration among employees and departments. By accessing the same reliable data set, teams can collaborate more efficiently, share information seamlessly and coordinate their activities. This leads to improved productivity, better coordination, and streamlined workflows.

04 Data Integrity and Quality

A centralised system for data storage and management helps ensure data integrity and quality. It allows data validation, standardisation and cleansing processes to be implemented at the source. By enforcing data governance policies, organisations can maintain high-quality data, reducing the risk of errors, duplication or inaccuracies arising when data is scattered across multiple systems.

05 Cost and Time Savings

Managing multiple systems with fragmented data can be costly and time-consuming. By consolidating data into a single source of truth, organisations can reduce the complexity and costs of maintaining multiple systems, integration efforts, and data reconciliation processes. It also eliminates the need for manual data entry, data migration, and synchronisation between systems.

06 Regulatory Compliance

A single source of truth simplifies compliance with various data protection, privacy, and reporting requirements for organisations operating in regulated industries. Organisations can demonstrate compliance and respond to audits or regulatory inquiries by maintaining accurate and auditable records more effectively.

In summary, a single source of truth for ERP or CRM systems ensures data consistency, enables better decision-making, fosters collaboration, improves data integrity, quality, saves costs, time, and facilitates regulatory compliance. It is a foundation for efficient and effective business operations, allowing organisations to optimise their processes and achieve their goals more successfully. That's why we focus on a single source of truth.

STREAMLINE, OPTIMISE & SUCCEED

ERP (Enterprise Resource Planning) and CRM (Customer Relationship Management) systems are essential for a successful business. An ERP system integrates various organisational departments and processes, such as finance, human resources, inventory management, and production planning. It streamlines operations, improves efficiency, and provides real-time visibility into critical business data, enabling better decision-making and resource allocation. On the other hand, a CRM system focuses on managing customer relationships and interactions. It helps businesses centralise customer data, track sales leads, manage marketing campaigns, and enhance customer service.

CHALLENGES THE BUSINESSES TO FACE WITHOUT A CRM OR AN ERP

Businesses without a Customer Relationship Management (CRM) system or an Enterprise Resource Planning (ERP) system may face the following challenges:

Inefficient Data Management

Without a CRM and ERP system, businesses struggle to manage customer data, sales information, inventory levels, and financial records efficiently. This often results in errors, duplication of efforts, and difficulty accessing critical information.

Limited Customer Insights

Without a CRM system, businesses lack a centralised database to track customer interactions, preferences, and purchase history. This hinders their ability to personalise marketing campaigns & offer tailored products or services.

Manual and Time-Consuming Processes

Without an ERP system, businesses rely on manual inventory management, order processing, and financial reporting processes. This can result in inefficiencies, errors, and increased labour costs.

Lack of Integration and Collaboration

Without CRM and ERP systems, different departments within a business may work in silos, using separate tools and databases. This leads to a lack of integration and collaboration, hindering effective communication and coordination.

Inaccurate Decision-Making

Without access to real-time data and comprehensive analytics provided by CRM and ERP systems, businesses may make decisions based on incomplete or outdated information. This can lead to poor strategic planning, inventory imbalances, and missed sales opportunities.

Limited Scalability

Manual processes and different systems make it tough to keep up with rising customer demand. Without CRM and ERP systems, businesses can struggle to manage everything smoothly.

Customer Services

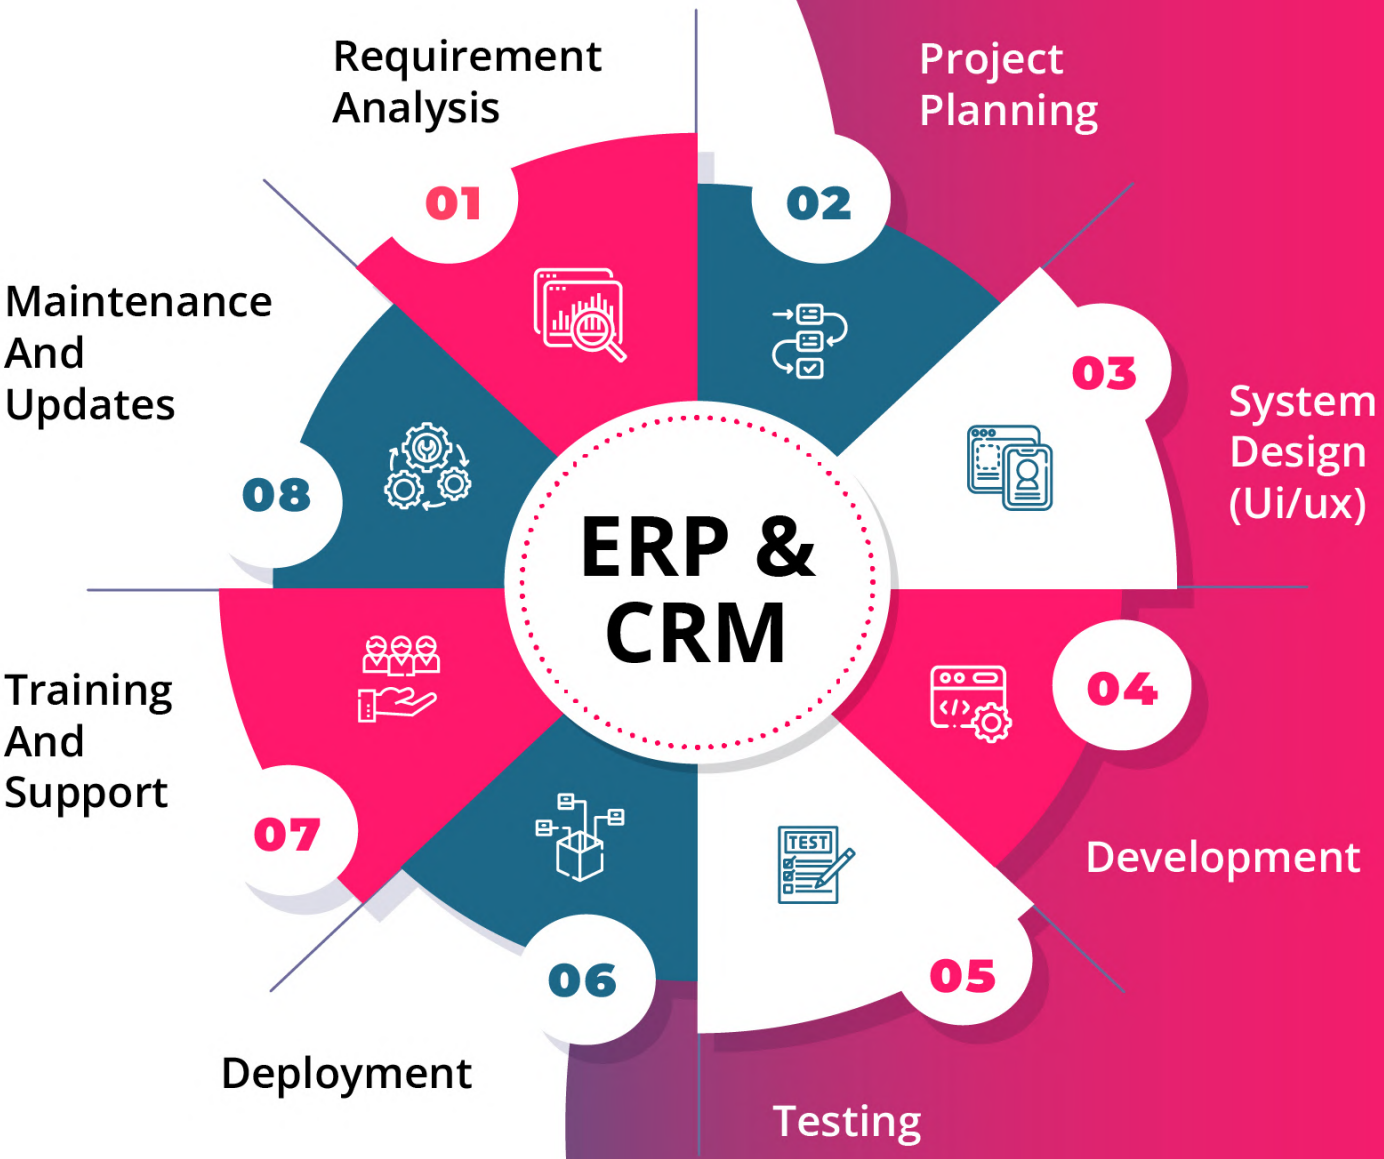

Without a CRM system, businesses may struggle to provide quick and personalised support. This can lead to delays in resolving customer problems, causing frustration. Additionally, tracking customer issues and preferences becomes difficult, which can effect service quality and customer satisfaction. As a result, businesses risk losing customers and damaging their reputation.

Summary

The absence of CRM and ERP systems can result in operational inefficiencies, hindered growth potential, reduced customer satisfaction, and decreased competitiveness in today's business landscape.

Requirement Analysis

At G-Tech Solutions, we initiate every ERP and CRM project with a comprehensive requirement analysis phase. This involves engaging with stakeholders to understand their unique business needs and overarching goals. We perform a detailed analysis of the existing systems and processes to identify gaps and areas for improvement. During this phase, we meticulously document both functional and non-functional requirements to ensure a clear understanding of the project's scope. Additionally, we identify any potential challenges or constraints that may impact the project's success, allowing us to devise strategies to mitigate these risks.

Project Planning

In the project planning phase, we aim to establish a robust foundation for the ERP and CRM projects to ensure their success. We begin by defining the project scope and objectives clearly, which guides all subsequent activities. A detailed project timeline is created, complete with milestones to track progress effectively. Resource allocation is carefully managed, with roles and responsibilities assigned to team members based on their expertise. To facilitate smooth communication throughout the project lifecycle, we establish comprehensive communication plans, ensuring all stakeholders remain informed and engaged at every stage.

System Design (UI/UX)

The system design phase at G-Tech Solutions is centered on creating intuitive and user-friendly interfaces for our ERP and CRM solutions. We start by designing wireframes and mockups that provide a visual representation of the user interface and experience (UI/UX). Feedback from users is gathered and incorporated to refine these designs, ensuring they meet user expectations and preferences. Our designs are crafted to align with branding guidelines while adhering to best practices in user experience. Additionally, we plan for scalability and future enhancements, ensuring that the systems can grow and evolve with the business needs over time.

Clean,
Efficient Code

Development

Seamless
Module Integration

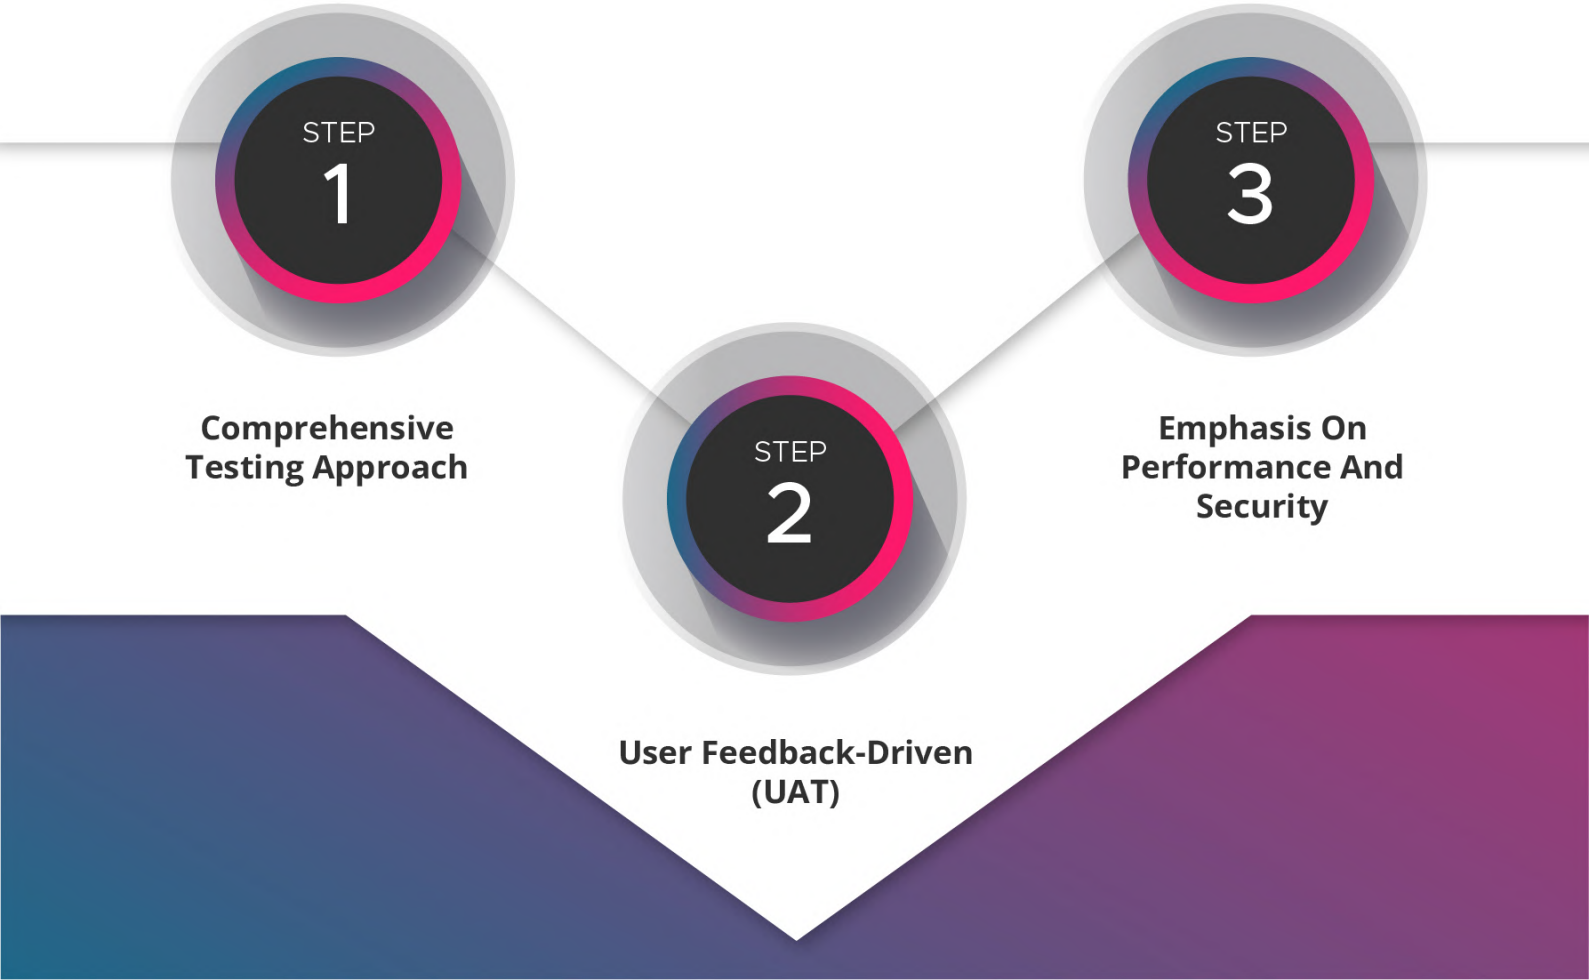

Adherence To
Best Practices

Development

The development phase at G-Tech Solutions is where the envisioned system takes shape. Our dedicated team of developers focuses on writing clean, efficient, and maintainable code to ensure the system's stability and longevity. Integration of various modules is meticulously executed to guarantee seamless interoperability across the system. Adherence to best practices and coding standards is a priority, with regular code reviews conducted to maintain high quality and optimal performance levels throughout the development process.

Testing

Quality assurance plays a pivotal role in our testing phase at G-Tech Solutions. We employ a comprehensive testing approach that includes unit testing to validate individual components, integration testing to ensure smooth functioning of interconnected modules, and User Acceptance Testing (UAT) to gather valuable feedback from end-users. Performance and security testing are also integral parts of our testing processes to fortify the system's robustness and reliability.

Deployment

Deploying the system seamlessly is crucial to minimize disruptions to business operations. Our deployment process entails meticulous preparation of the deployment environment, ensuring all prerequisites are met before the system goes live. Data migration from legacy systems, if required, is handled with precision. Final checks are conducted before deployment to guarantee a smooth transition, followed by post-deployment monitoring to promptly address any unforeseen issues that may arise.

Meticulous Preparation

Data Migration Expertise

Post-Deployment Monitoring

Training and Support

At G-Tech Solutions, we place a strong emphasis on providing comprehensive training and support to empower users in effectively utilizing the newly implemented system. Tailored training sessions catered to different user groups are conducted to ensure maximum proficiency. Detailed user manuals and documentation are provided for reference, supplemented by ongoing support through multiple channels such as email, phone, and chat. Additionally, a helpdesk is established to facilitate quick issue resolution and continuous user assistance.

Tailored Training Sessions

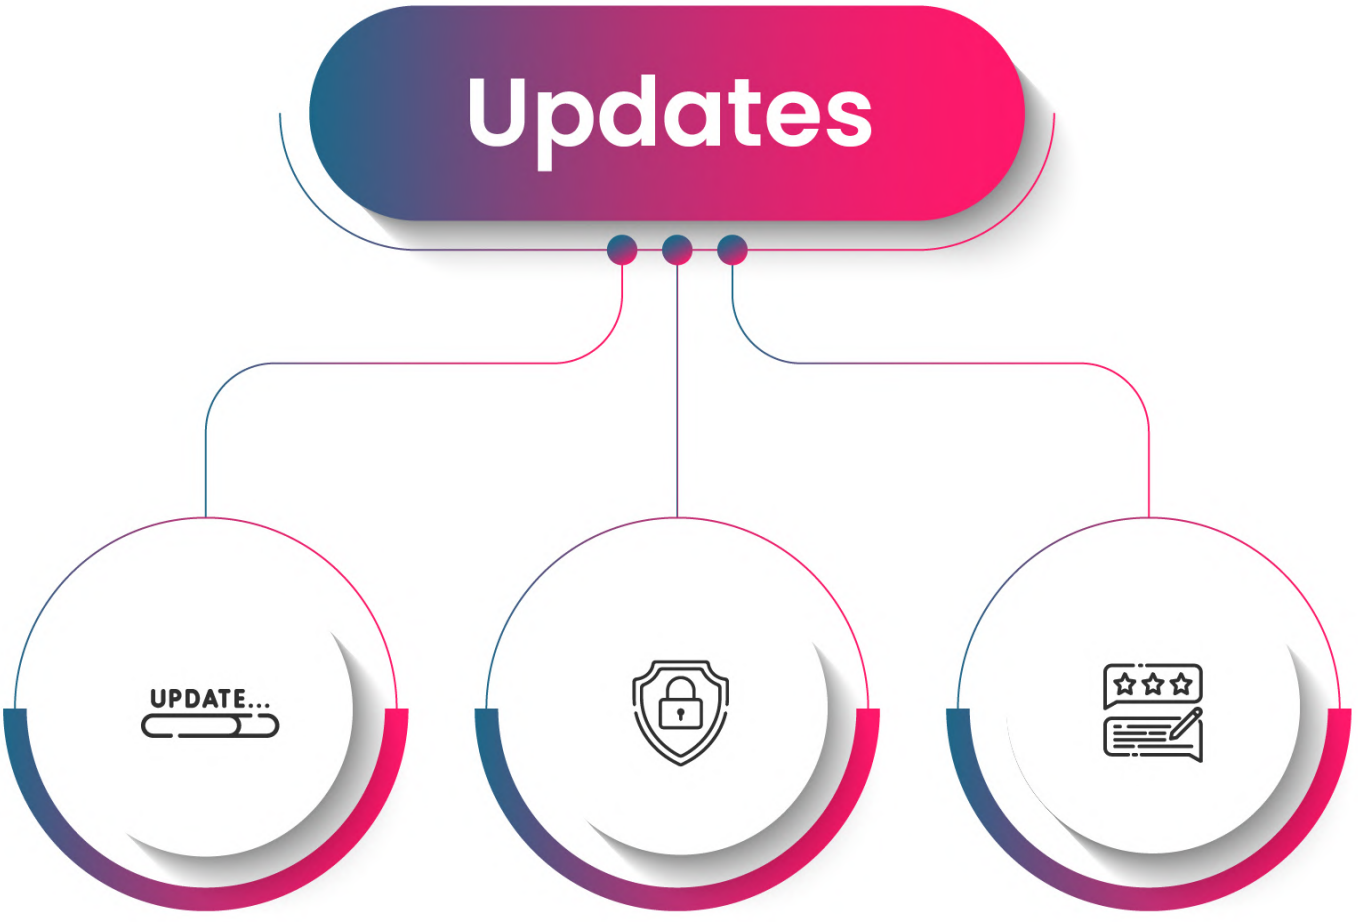

Comprehensive User Manuals

Multi-Channel Support

Updates and Maintenance

Continuous enhancement and maintenance are integral components of our service offering at G-Tech Solutions. Our updates and maintenance phase involves regular release of updates aimed at improving functionality and performance based on user feedback. Security vulnerabilities are addressed through timely implementation of patches. User feedback is actively gathered to drive future enhancements, while long-term support and maintenance contracts ensure the sustained optimal performance of the system.

OUR PROJECTS

Retail Hub

Retail Hub is a dynamic multi-vendor e-commerce platform designed to streamline and enhance the connection between wholesalers and retailers. It provides a comprehensive set of features tailored to meet the needs of different user types: Super Admin, Wholesalers, and Retailers.

Key Features

Super Admin Section:

- Manage Wholesaler And Retailer
- Manage Accounts And Permissions
- Update Website Content & Design
- Handle Platform-wide Financial Transactions
- Can Update Inventory Of Different Outlets

Wholesaler Section:

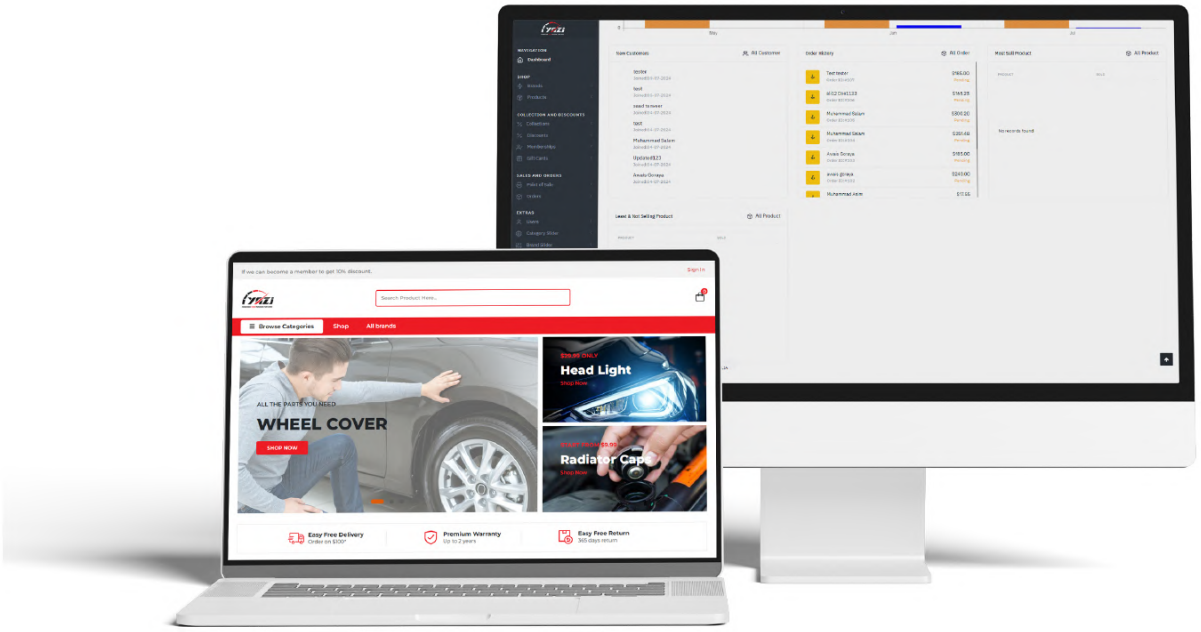

- Manage Product Details
- Manage Inventory & Postcodes
- Order Management
- Track Sales Performance & Inventory Levels
- Manage Payments, Delivery Charges & Invoices

Retailer Section

- Search Products From Different Wholesalers
- Order Placement
- Add To Cart & Checkout
- Order History

YAZI

Our team successfully developed and implemented, an e-commerce platform tailored for automotive enthusiasts and consumers. Yazi offers a diverse range of automotive products, including accessories, tools, and car care essentials. Yazi is designed to provide a seamless shopping experience with user-friendly navigation and organised product categories.

Key Features

Admin Side:

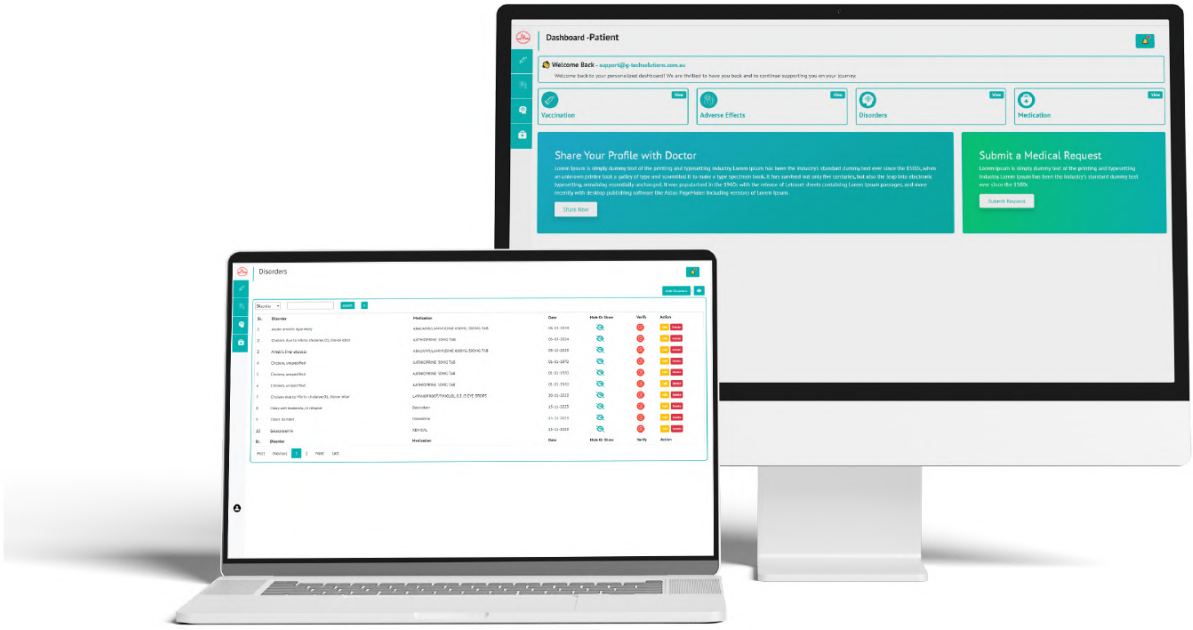

- Dashboard With Key Metrics
- Product & Brand Management
- Inventory & Discount Management
- Sales And Order Processing
- Point Of Sale (Pos) Functionality
- Invoice Creation & Management
- Membership Plan Management
- User Account Management
- Collection Management
- Website Settings Configuration

User Side:

- User-friendly Navigation
- Product Display & Recommendation
- Shop By Brand & Categories
- Shopping Cart & Checkout

Medical Organiser

G-Tech Solutions successfully completed the development of the Medical Organiser, a comprehensive healthcare management system. This project addresses both patient and doctor needs by offering functionalities such as account management, vaccination tracking, adverse effect reporting, disorder, medication management, and secure profile sharing. It significantly enhances patient-doctor interactions.

Key Features

Doctor Side

- Doctor Registration And Login
- Patient Request Management
- Patient Record Updates
- Medication Prescription And Review
- Adverse Effects Monitoring
- Vaccination Scheduling

Allied Professionals Side

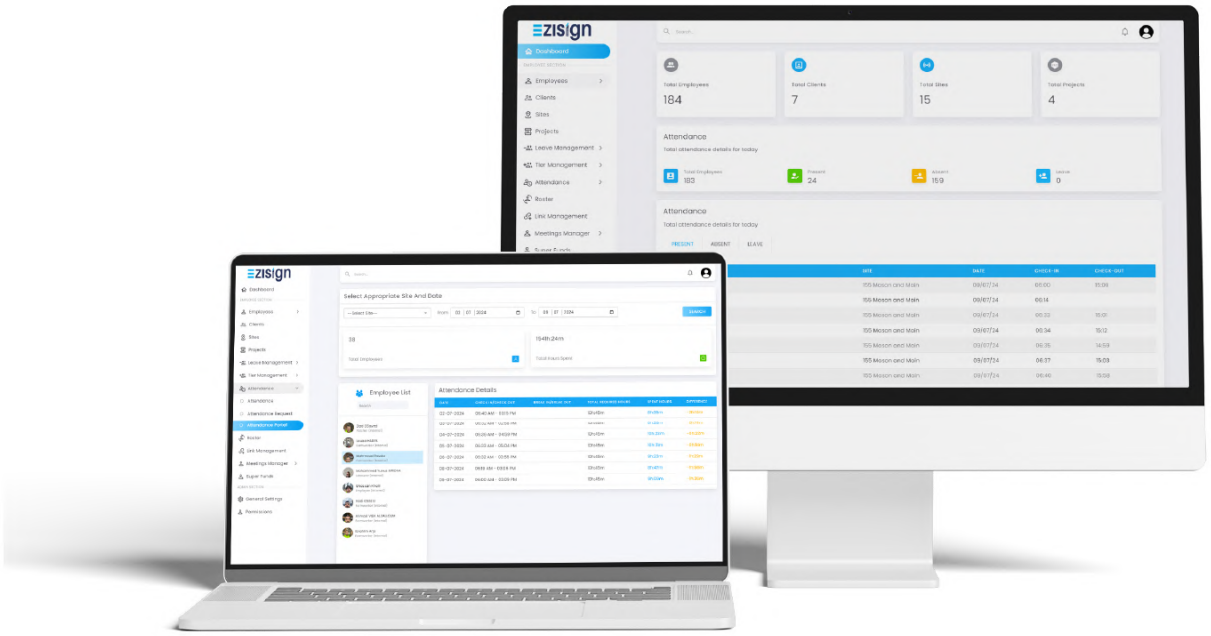

- Allied Professional Registration And Login
- Patient Request Management
- Access To Patient Records
- Medication Review
- Adverse Effects Monitoring
- Vaccination Record Review

Patient Side

- User Registration And Login
- Medication Management
- Adverse Effects Logging
- Social History Recording
- Disorder Tracking
- Vaccination Records Management
- Health Professional Requests
- Access To Support Resources
- Reminder Notifications
- Health Journal

Ezisign

G-Tech Solutions developed an ERP System to enhance business efficiency by integrating core processes within an organisation. It facilitates seamless management of employees, attendance, and other key business functions through an user-friendly interface, ensuring optimal productivity and coordination.

Key Features

- Employees Clock In/out
- Tracks Attendance By Work Location
- Captures Employee Image At Each Clock-in
- Set Work Schedules For Employees
- Streamlined Signup Process For Subcontractors
- Export Attendance Data By Teams And Sites
- Web Portal And Mobile App For Access
- Get Reports Tailored To Your Specific Needs

AusRelief

At G-Tech Solutions, we embrace the philosophy of "Thinking Beyond Limits" ensuring that our clients can focus on sustainable success while we provide the necessary support. Our support for AusRelief exemplifies this commitment, as the project is dedicated to alleviating poverty, sickness, and under-development through innovative and sustainable solutions.

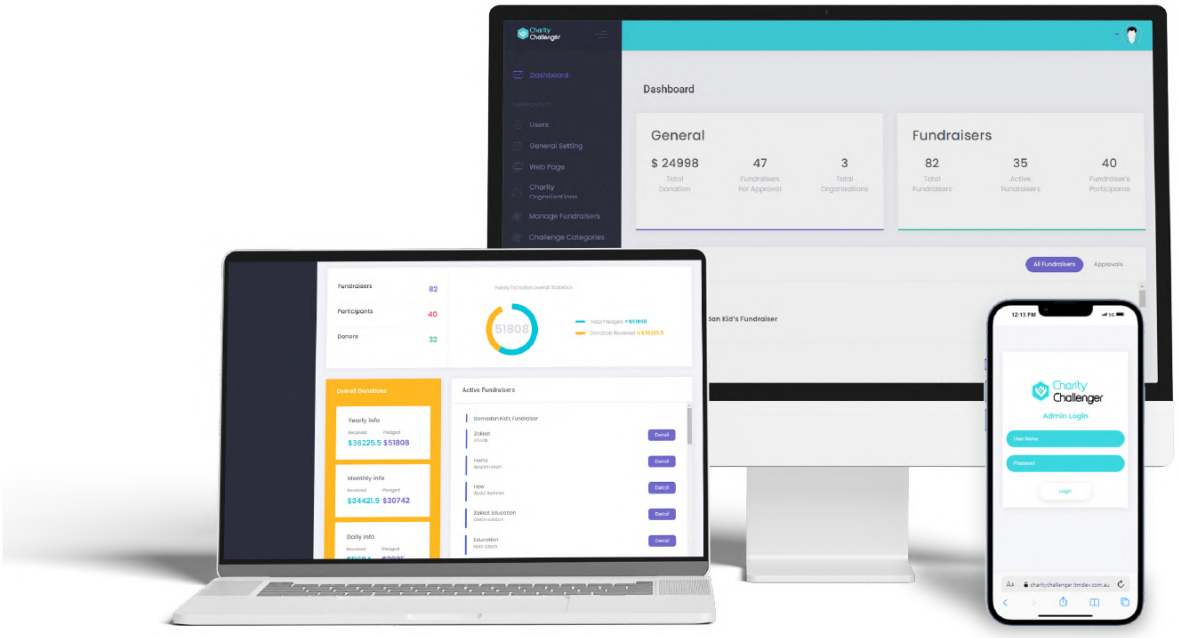

Key Features

- Innovative Products And Services
- Dynamic Fundraising Campaigns
- Secure Donation Processes
- Comprehensive Zakat Calculator
- Organisational Partnerships
- Volunteer Opportunities

Charity Challenger

Charity Challenger is an all-in-one platform designed to help charities, organisations, individuals create, manage, and participate in fundraising challenges. It provides a robust admin panel for managing donations, fundraisers, and participants, along with an intuitive front-end interface for a seamless user experience. The platform streamlines the process of running and engaging in charitable activities.

Key Features

Admin Panel

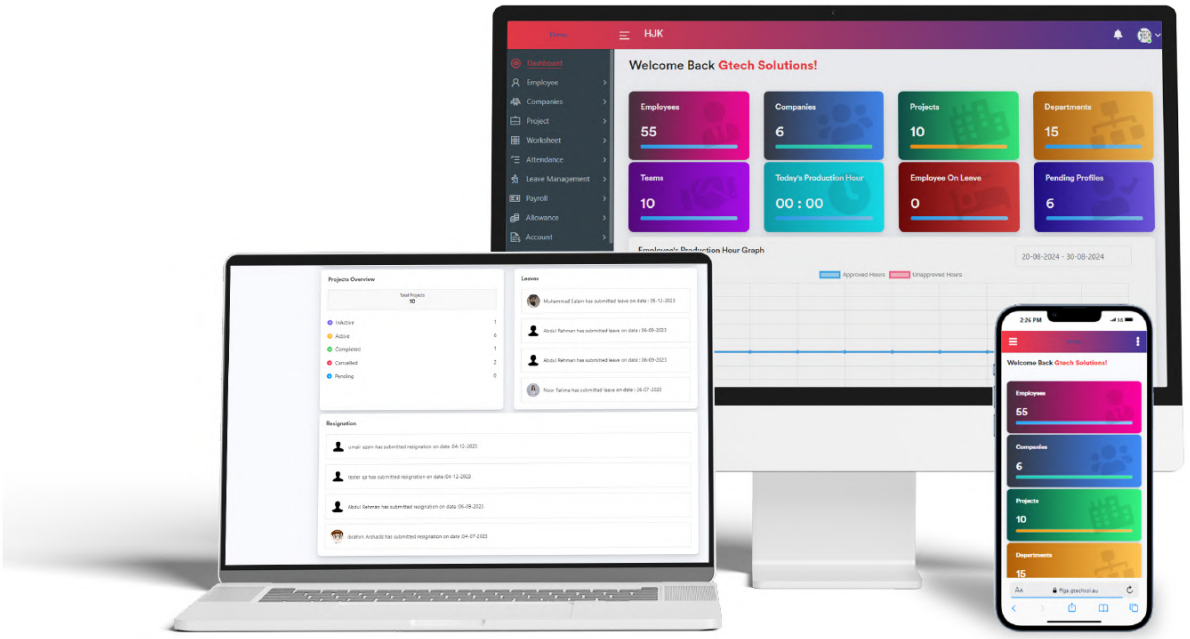

- Manage User Accounts, Roles & Permissions.
- Manage, Edit & Monitor Fundraising Campaigns.
- Add, Edit & Remove Fundraiser Organisations.
- Manage Website Content.
- Organise Fundraiser Categories.
- View And Analyse Donation Data.
- Configure System-wide Settings.

Frontend Interface

- Intuitive Web & Mobile App Interface.
- Web Users Can Create & View Fundraisers.
- Log In With Fingerprint Authentication.
- View & Join All Fundraisers, Including "My Fundraiser" And "Donor".
- Optimized For All Devices With Real-time Updates.

FFGA

FFGA is designed to streamline employee management, payroll processing, and administrative tasks. It offers a range of tools to help organisations manage their workforce effectively, from onboarding to offboarding.

Key Features

Admin Panel

- Quick Registration & Manage Employees
- Organise Departments.
- Monitor Employee Attendance & Work Hours.
- Request, Approve & Track Leaves.
- Handle Payroll, Allowances & Deductions.
- Organise Projects
- Track Time Via Worksheets.
- Add & View Expenses,
- Add & View Termination And Resignation List.
- Manage Tax Details And Compliance.
- Control User Permissions And Settings.

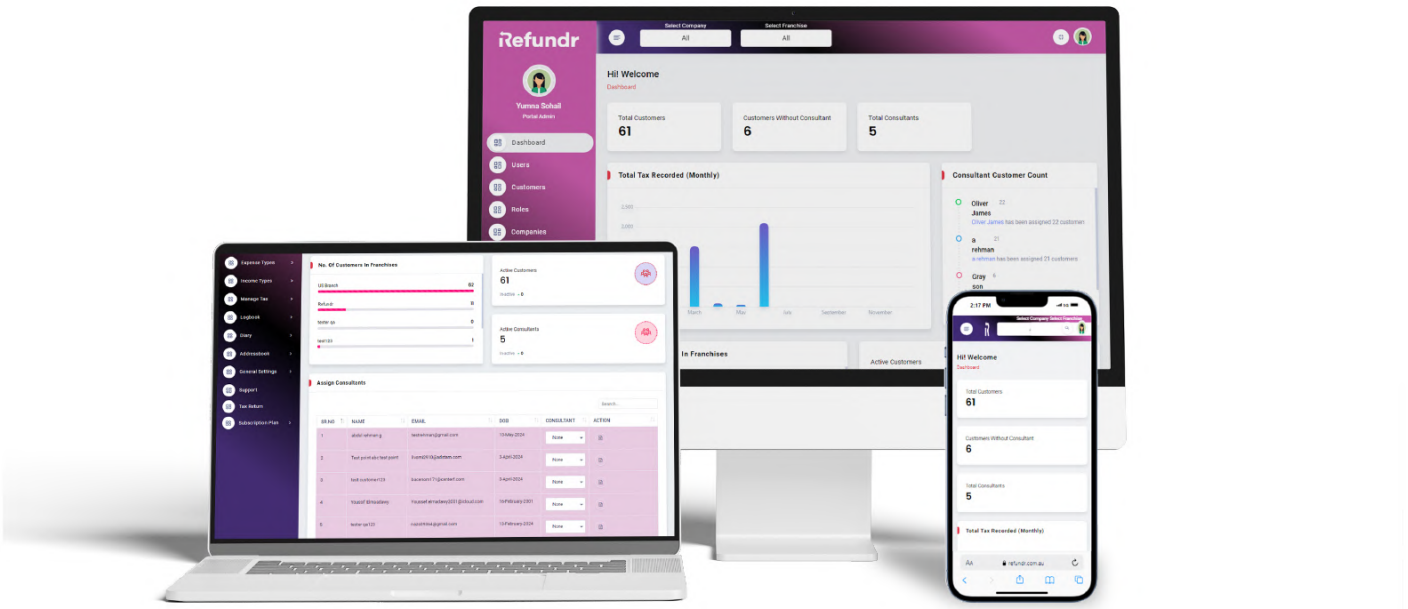

Frontend Interface

- Employees Log In With Their ID.
- Submit And Track Leave Requests
- Receive Notifications.
- Mark Attendance & View Records.
- Employees Can View Their Profile Details.

Refunder

Overview

The Refundr Platform provides a comprehensive solution with a web-based admin panel for administrators and a mobile app for users. The admin panel empowers administrators to manage users, customers, financial transactions, and subscriptions, while also overseeing detailed tax management, including handling tax returns, income, and expense types. The mobile app offers a user-friendly interface for customers to access their accounts, track services, and stay updated in real-time.

Key Features

Admin Panel

- Manage Users, Customers & Roles.
- Manage Companies, Franchises & Consultants.
- Track Company & Rental Expenses, And Income.
- Organise Tax Documents & Financial Reports.
- Manage Vehicle Data For Tax Purposes.
- Handle Support Queries, Tax Returns, And Subscription Plans.
- Record Detailed Diary Entries.
- Manage Customer Contacts.

Frontend Interface

- Manage Property Details, Income, & Expenses.
- Submit Tax Return Requests.
- Add, Manage, And Sell Property Shares.
- Use A Tax Estimator For Calculations.
- Chat With Tax Experts For Advice.
- Scan Documents To Manage Records
- View Detailed Financial Graphs Of Deductions And Income.
- Receive Notifications.
- Manage Subscription Plans.
